### *materials...*

All our canvases are printed onto artistic high quality 440g canvas. We use the latest in print technology and all our canvases are printed using our state of the art UV stable inks. This ensures vibrant colours and resistant to fade. Once printed all our canvases are stretched around 36mm thick exhibition grade precision cut softwood frames. Our in house team of professional stretchers ensures each canvas is properly stretched and all staples are neatly fixed on the rear.
